

Webinar: Coping with grief and loss during COVID-19

Amazingly, most - if not all - Americans, along with the world's citizens, have suffered losses as a direct result of the pandemic, from loss of loved ones and economic stability to missing milestones, events and gatherings, to the loss of social freedom and comfort.

As we try to return to what life was like before the pandemic, we should take the time to discuss how these losses affected us and how we can address our feelings and behavior in a healthy way to move forward and thrive.

We invite you to participate in our webinar with Dr. Varun Choudhary, MD, MA, DFAPA, Magellan Healthcare senior vice president, chief medical officer, behavioral health; Dr. Sagar Makanji, PharmD, Magellan Rx vice president, clinical strategy and programs; and Dr. Mark Santilli, PharmD, Magellan Rx senior director, clinical strategy and programs, as they share their knowledge and tips on coping with grief and loss caused by COVID-19 and answer questions from the audience.

Date/time: Thursday, June 24, 2021, 2:00 p.m. ET
