\*\*\*\*\* Schematic Codes Information \*\*\*\*\*

The Schematic Code is a six-digit code that presents data about a class in a systematic fashion to differentiate it from all other County classes. Each code is unique to the particular class and identifies four basic elements: occupation, class series affiliations, class level, and type of class (regular, confidential, exempt, etc.). For supervisory and higher classes, the fourth digit is used. In addition, the sixth digit has been reserved for miscellaneous purposes.

X 0 0 0 0-0 First Digit Occupational Group Code All related series have the same Occupational Group Code. The Occupational Group Code is defined by the basic nature of the series' organizational function within the County based primarily on the characteristics of the journey level class.

- 0 Officials
- 1 Administrative Services classes
- 2 Fiscal and Systems classes
- 3 Office and Facility Support Services classes
- 4 Community Services classes
- 5 Health Services classes
- 6 Protective and Regulatory Services classes
- 7 Social Services classes
- 8 Technical Services classes
- 9 Skilled Craft and Maintenance Services classes

0 X X 0 0-0 Second and Third Digits Series Code All classes in a series have the same Series Code. The series are arranged alphabetically using the journey level class title as the key or foundation. The second and third digits are a pair and must be used as one number; when using the series code, the occupational group code must also be used.

0 0 0 X 0-0 Fourth Digit Class Level Code Within each series, each class is further defined by its level: entry, journey, advanced-journey, supervisory, etc. The Class Level code may be used alone or in combination with any of the other codes. It's most often used to get a listing of all classes at the same level, either countywide or in a specific occupational group(s).

- 0 Department heads and officials
- 1 Assistant department heads, top administrators, high-level staff, specialists, and assistants
- 2 Division chiefs and assistants
- 3 Bureau chiefs, section chiefs and assistants, second-line managers
- 4 Unit chiefs, first-line managers, second-line supervisors
- 5 First-line supervisors
- 6 Advanced journey level workers, specialists, lead workers
- 7 Journey level workers
- 8 Entry level, trainees; the lower level of a class that has two salary levels
- 9 Transition classes, or multi-series entry classes or sub-entry level classes

0 0 0 0 X-0 Fifth Digit Class Type Code Each class is identified as an official regular class, an official confidential class, an exempt class, etc. If a series has more than one class with the same class level code, the Class Type Code is used to indicate this. For example, a series may have a lead worker level and an advanced-journey worker level. Both have the same class level code, so the Class Type Code is used for one of the classes to indicate that it is at the same level as another class in the series. A letter instead of a number in the fifth digit indicate a special skills class.

- 0 Exempt from Civil Service
- 1 Regular class approved by the Civil Service Commission and the Board of Supervisors.
- 2 Confidential class, also approved by the Civil Service Commission and the Board of Supervisors.
- 3 More than one class in the series is at the same class level and therefore should have the same fourth digit. The actual class level

- of a fifth digit with this code is the same as the class directly above it in the series.
- 4 Same as 3 above
  - 5 Same as 3 above
  - 6 Not used
  - 7 Unofficial class for payroll purposes only
  - 8 Inactive or to be abolished. The information shown is updated if there are incumbents, otherwise the information may not be updated.
  - 9 Abolished. Abolished classes may be shown in the report for one year after the date of abolishment. Revised and/or retitled classes may retain their codes or have new codes.
